Date	Subject	Response	Follow-Up
2/3	Research Document (Ramesh Ramalingam)	Looks good; lots of research has been done; consider what data/area of the internet you are fact-checking, recommend a smaller area of data; consider user-feedback as a way to identify disinformation; identify reliable sites you could use as reference fact-checks	Confirmed
2/3	Design Constraints (Corrigan Johnson)	Informative; professional-looking; design constraints are a good starting point; ensure extension is available to evaluate content quickly w/o interruptions; be mindful of lack of availability when checking Breaking News stories	Confirmed
2/21	Coding the Extension (Corrigan Johnson)	Using AI/machine learning is very ambitious and difficult; use Google's APIs when coding; make a website that links users to the extension; open the potential to monetize the process; UI display/goals are realistic and attainable	One of the group members responded saying that he believes we can machine learning and therefore we will attempt it.
